The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS AND THE HELICOPTER ASSOCIATION OF GREAT BRITAIN

VOLUME LXXXI

JANUARY–DECEMBER 1977

The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS AND THE HELICOPTER ASSOCIATION OF GREAT BRITAIN

VOLUME LXXXI

JANUARY–DECEMBER 1977

ACTIVE control technology, A. Simpson and H. P. Y. Hitch, pp 231–246 (June).

ADVANCED TECHNOLOGY
The role of advancing technology in the future of air transport, K. G. Wilkinson, pp 185–192 (May).

AERIAL SPRAY EQUIPMENT
Testing distribution equipment for agricultural aviation, W. S. Watts, pp 102–106 (March).

AERODYNAMICS
Active control technology, A. Simpson and H. P. Y. Hitch, pp 231–246 (June).
An aerofoil with control surface in incompressible viscous flow, B. C. Basu, pp 554–555 (Dec.).
Angle of incidence, Wilbur Wright, pp 1–2 (Jan.).
Computers and wind tunnels: complementary aids to aircraft design, A. B. Haines, pp 306–321 (July).
The control of vibration in helicopters, D. E. H. Balmford, pp 63–67 (Feb.).
Effect of aerofoil characteristics on windmill performance, R. T. Griffiths, pp 322–326 (July).
Finite difference solutions of compressible viscous fluid flows over pitching bluff bodies, C. M. Leech and D. Chan, pp 415–421 (Sept.).
Flying aeroplanes in buffet, Dr. A. Jean Ross, pp 427–436 (Oct.).
Lift and moment fluctuations of a cambered aerofoil under non-convecting streamwise gust, S. S. P. Rao, V. Mukhopadhyay and J. S. Rao, pp 83–87 (Feb.).
The measurement of performance, stability and control characteristics of a high subsonic jet aircraft in non-steady flight conditions employing high accuracy instrumentation techniques, Ir. J. A. Mulder, pp 247–258 (June).
The streamline aeroplane, B. Melvill Jones, pp 5–9 (Jan.).
Thick, two-dimensional wake roll-up behind a wing of finite span—extended calculations, H. Portnoy, pp 460–463 (Oct.).

AERO engine development costing, R. M. Fitzgerald, pp 405–409 (Aug.).

AEROSPACE
Aerospace cost prediction—the way ahead, J. E. A. Harrison, pp 213–219 (May).
Energy and aerospace, Robert C. Seamans, Jr, pp 147–169 (April).

AGRICULTURAL AVIATION
Developing an Agprop, D. G. M. Davis, pp 97–101 (March).
Engines for agricultural aircraft, R. W. Harker, pp 107–109 (March).
Testing distribution equipment for agricultural aviation, W. S. Watts, pp 102–106 (March).

AIRCRAFT
AgCat, Grumman (illus.), p 100, Cover (March).
Boeing 747 (illus.), Cover (Aug.).
Boeing 747 (illus.), Cover (Oct.).
Canberra (illus.), p 486 (Nov.).
Concorde flight deck area (illus.), Cover (Sept.).
Concorde simulator (cockpit), (illus.), Cover (July).
Energy efficient transport (model), (illus.), p 192 (May).
F28 Fellowship (illus.), Cover (May).
Glas II suction wing glider (illus.), p 491 (Nov.).
Hawker Hunter with static pressure trailing cone (illus.), p 248 (June).
HS P.1154 project (illus.), p 39 (Jan.).
Heavy lift lighter-than-air craft (artist's impression), (illus.), p 156 (April).
Hypersonic transport (artist's impression), (illus.), p 449 (Oct.).
Lancaster (with experimental laminar flow wing), (illus.), p 187 (May).
Lighter-than-air feeder craft (artist's impression), (illus.), p 156 (April).
Liquid hydrogen subsonic transport (illus.) p 447 (Oct.).
Liquid hydrogen supersonic transport (artist's impression), (illus.), p 449 (Oct.).
Orbiter Enterprise (illus.), Cover (April).
Panavia Tornado multi-role combat aircraft (illus.), Cover (June).
SD3-30 commuter airliner (illus.), p 176 (April).
Sea Harrier—the first of the new wave, J. W. Fozard, pp 15–40, Cover (illus.), (Jan.).
Span loader cargo aircraft (artist's impression), (illus.), p 446 (Oct.).
Skyvan STOL transport (illus.), p 171 (April).
The Wright 1903 'Flyer' (illus.), p 166 (April).
X-21A (with laminar flow control wing), (illus.), p 187 (May).

Helicopters
Bell 205 airborne V/STOL simulator (illus.), p 498 (Nov.).
'Wisp' remotely piloted helicopter (illus.) p 387 (Sept.).

AIRCRAFT DESIGN
Atmospheric turbulence loads on aircraft, J. Taylor, pp 528–553 (Dec.).
Computer aided aircraft project design, H. P. Y. Hitch, pp 51–62 (Feb.).
Computers and wind tunnels: complementary aids to aircraft design, A. B. Haines, pp 306–321 (July).

AIR DEFENCE
The air defence of the West—a view from NATO's Central Region, General Richard H. Ellis, pp 373–376 (Aug.).

AIR LAW
The continued employment of pilots involved in incidents or accidents: the operators' responsibilities and liabilities, Marcus Edwards, pp 209–212 (May).
Legal aspects of mandatory occurrence reporting and CAA powers and duties in the context of pilot licensing, G. M. E. White, pp 199–201 (May).
The dismissal of a pilot for poor airmanship, Captain H. A. Hopkins, pp 203–206 (May).
The dismissal of a pilot for poor airmanship—the employer's point of view, Captain A. J. Burridge, pp 206–208 (May).
The continued employment of pilots involved in incidents or accidents: the operators' responsibilities and liabilities, Marcus Edwards, pp 209–212 (May).

AIR TRANSPORT
Air transport demand 2000—through a glass darkly, Stephen F. Wheatcroft, pp 366–372 (Aug.).
Aviation activities in global perspective, Prof. L. Lukasiewicz and Dr. K. W. Studnicki-Gizbert, pp 451–459 (Oct).
Basic safety concepts, Dr. Walter Tye, pp 271–275 (June).
Civil transport aviation—progress and promise, J. E. Steiner, pp 353–365 (Aug.).
A complex market sector, Alan R. Buley, pp 193–198 (May).
The market for small airlines to the early eighties, Philip F. Foreman, pp 171–176 (April).
The prediction of design and development costs of civil airliners, K. C. Harrold and S. I. R. Nicol, pp 139–146 and 170 (April).
The role of advancing technology in the future of air transport, K. G. Wilkinson, pp 185–192 (May).
Third level operations in the United Kingdom, M. A. Ambrose, pp 124–131 (March).
A view of the future—constraints and opportunities, Gerald G. Kayten, pp 335–341 (Aug.).

ALLEN, J. E.
Have energy, will travel, pp 259–270 (June).

AMBIENT temperature crack growth in titanium alloys and its significance for aircraft structures, R. J. H. Wanhill, pp 83–87 (Feb.).

AMBROSE, M. A.
Third level operations in the United Kingdom, pp 124–131 (March).

AN aerofoil with control surface in incompressible viscous flow, B. C. Basu, pp 554–555 (Dec.).

ANGLE of incidence (Eighty Years of Aviation), Wilbur Wright, p 1 (Jan.).

ANGLO-AMERICAN AERONAUTICAL CONFERENCE—15th
The air defence of the West—a view from NATO's Central Region, General Richard H. Ellis, pp 373–376 (Aug.).
Air transport demand 2000—through a glass darkly, Stephen F. Wheatcroft, pp 366–372 (Aug.).
Aircraft noise and other types of pollution, F. G. Hurtubise, D. H. McKay and F. Macenko, p 469–477 (Nov.).
Aviation activities in global perspective, Prof. J. Lukasiewicz and Dr. K. W. Studnicki-Gizbert, pp 451–459 (Nov.).
Basic safety concepts, Walter Tye, pp 271–275 (June).
The changing horizons for technical progress, L. E. Frisbee and R. H. Hopps, pp 437–450 (Nov.).
Civil transport aviation—progress and promise, J. E. Steiner, pp 353–365 (Aug.).
The future of rotorcraft in aviation, Dr. J. P. Jones, pp 381–387 (Sept.).
Have energy, will travel, John E. Allen, pp 259–270 (June).
A view of the future—constraints and opportunities, Gerald G. Kayten, pp 335–341 (Aug.).

ATMOSPHERIC turbulence loads on aircraft, J. Taylor, pp 528–553 (Dec.).

AVIATION EFFICIENCY
Energy and aerospace, Robert C. Seamans, Jr., pp 147–169 (April).

AVIATION safety versus employment protection: a conflict? Air Law Group Symposium, pp 199–212 (May).

AVIONICS
Power utilisation in electronic loads, Dr. A. Bainbridge, pp 399–404 (Sept.).
The problems of research and development cost prediction in an avionics supply company, H. K. Quilter, pp 410–414 (Sept.).
The systems approach to airborne electrical power supplies, J. P. Ratcliffe, pp 388–398 (Sept.).

BAINBRIDGE, Dr. A.
Power utilisation in electronic loads, pp 399–404 (Sept.).

BALMFORD, D. E. H.
The control of vibration in helicopters, pp 63–67 (Feb.).

BARRETT, R. V.
Spray from aircraft undercarriages at high speed—a model investigation, pp 220–225 (May).

BASIC safety concepts, W. Tye, pp 271–275 (June).

BASU, B. C.
An aerofoil with control surface in incompressible viscous flow, pp 545–555 (Dec.).

BRITISH COMMONWEALTH LECTURE—33rd
The Commonwealth Advisory Aeronautical Research Council and its influence on research in the Commonwealth, R. W. G. Gandy, pp 478–501 (Nov.).

BUCKLING of simply supported cross-ply cylindrical panels on elastic foundations, G. J. Turvey, pp 88–91 (Feb.).

BULEY, ALAN R.
A complex market sector, pp 193–198 (May).

BUCKLING
Buckling of simply supported cross-ply cylindrical panels on elastic foundations, G. J. Turvey, pp 88–91 (Feb.).

BURRIDGE, CAPTAIN A. J.
The dismissal of a pilot for poor airmanship—the employer's point of view, pp 206–208 (May).

CHADWELL, J. A.
Operational aspects of mandatory occurrence reporting, pp 201–203 (May).

CHAN, D. and LEECH, C. M.
Finite difference solutions of compressible viscous fluid flows over pitching bluff bodies, pp 415–421 (Sept.).

CHANGING horizons for technical progress, L. E. Frisbee and R. H. Hopps, pp 437–450 (Oct.).

CIVIL transport aviation—progress and promise, J. E. Steiner, pp 353–365 (Aug.).

COMMONWEALTH Advisory Aeronautical Research Council and its influence on research in the Commonwealth, R. W. G. Gandy, pp 478–501 (Nov.).

COMMUTER AIR TRANSPORT
The market for small airliners to the early eighties, Philip F. Foreman, pp 171–176 (April).
Third level operations in the United Kingdom, M. A. Ambrose, pp 124–131 (March).

COMPOSITE MATERIALS
Buckling of simply supported cross-ply cylindrical panels on elastic foundations, G. J. Turvey, pp 88–91 (Feb.).

COMPUTERS
Computer aided aircraft project design, H. P. Y. Hitch, p 51–62 (Feb.).
Computers and wind tunnels: complementary aids to aircraft design, A. B. Haines, pp 306–321 (July).

CONTROLS
Active control technology, A. Simpson and H. P. Y. Hitch, pp 231–246 (June).
Controlling the attitude and two flexure-modes of a flexible satellite, E. H. Smith, pp 41–44 (Jan.).

COST PREDICTION
Aero engine development costing, R. M. Fitzgerald, pp 405–409 (Sept.).
Aerospace cost prediction—the way ahead, J. E. A. Harrison, pp 213–219 (May).
The prediction of design and development costs of civil airliners, K. C. Harrold and S. I. R. Nicol, pp 139–146 and 170 (April).
The problems of research and development cost prediction in an avionics supply company, H. K. Quilter, pp 410–414 (Sept.).

COWELL, J.
An airline view, flight simulator instructor training symposium, pp 521–523 (Dec.).

DAVIS, D. G. M.
Developing an Agprop, pp 97–101 (March).

DESIGN and performance of high temperature turbines in turbofan engines, G. L. Wilde, pp 342–352 (Aug.).

DEVELOPMENTS in mathematical models of human pilot behaviour, Prof. dr. ir. O. H. Earlach, pp 293–305 (July).

DRAG
The streamline aeroplane, B. Melvill Jones, pp 5–9 (Jan.).

DRURY, H. P.
Electrical power—factors to be considered in future civil aircraft of moderate complexity, pp 502–508 (Nov.).

EDWARDS, MARCUS
The continued employment of pilots involved in incidents or accidents: the operators' responsibilities and liabilities, pp 209–212 (May).

EARTH RESOURCES SATELLITES
Energy and aerospace, Robert C. Seamans, Jr., pp 147–169 (April).

EIGHTY YEARS OF AVIATION
Angle of incidence, Wilbur Wright, pp 1–2 (Jan.).
Experimental test flying, C. F. Uwins, pp 2–5 (Jan.).
High speed test flying, Lt.-Colonel Charles E. Yeager, pp 10–14 (Jan.).
The streamline aeroplane, B. Melvill Jones, pp 5–9 (Jan.).

ELECTRICAL power—factors to be considered in future civil aircraft of moderate complexity, H. P. Drury, pp 502–508 (Nov.).

ELECTRONICS
Power utilisation in electronic loads, Dr. A. Bainbridge, pp 399–404 (Sept.).
The systems approach to airborne electrical power supplies, J. P. Ratcliffe, pp 388–398 (Sept.).

ELLIS, GENERAL RICHARD H.
The air defence of the West—a view from NATO's Central Region, pp 373–376 (Aug.).

ENERGY
Have energy, will travel, John E. Allen, pp 259–270 (June).
Engines for agricultural aviation, R. W. Harker, pp 107–109 (March).

ERRATA
To paper by F. W. Armstrong published in December 1976, p 499 (Jan.).
To paper by G. L. Wilde published in August, p 513 (Nov.).

EXPERIMENTAL test flying, C. F. Uwins, pp 2–4 (Jan.).

EUROPEAN PIONEERS DAY LECTURE—2nd
Computers and wind tunnels: complementary aids to aircraft design, A. B. Haines, pp 306–321 (July).

EVALUATION of human exposure to helicopter vibration, M. J. Griffin, pp 110–123 (March).

FITZGERALD, R. M.
Aero engine development costing, pp 405–409 (Sept.).

FLIGHT simulator instructor training: Flight Simulation Group half-day symposium, pp 515–527 (Dec.).

FLIGHT TESTING
Experimental test flying C. F. Uwins, pp 2–5 (Jan.).
Flying aeroplanes in buffet, Dr. A. Jean Ross, pp 427–436 (Oct.).
High speed test flying, Lt.-Colonel Charles E. Yeager, pp 10–14 (Jan.).
The measurement of performance, stability and control characteristics of a high subsonic jet aircraft in non-steady flight conditions employing high accuracy instrumentation techniques, Ir. J. A. Mulder, pp 247–258 (June).

FLUID DYNAMICS
An aerofoil with control surface in incompressible viscous flow, B. C. Basu, pp 554–555 (Dec.).
Finite difference solutions of compressible viscous fluid flows over pitching bluff bodies, C. M. Leech and D. Chan, pp 415–421 (Sept.).

FOREMAN, PHILIP F.
The market for small airliners to the early eighties, pp 171–176 (April).

FOZARD, J. W.
Sea Harrier—the first of the new wave, pp 15–40 (Jan.).

FRACTURE PROPERTIES
Ambient temperature crack growth in titanium alloys and its significance for aircraft structures, R. J. H. Wanhill, pp 68–82 (Feb.).

FRISBEE, L. E. and HOPPS, R. H.
The changing horizons for technical progress, pp 437–450 (Oct.).

FUTURE OF AVIATION
Air transport demand 2000—through a glass darkly, Stephen F. Wheatcroft, pp 366–372 (Aug.).
Aviation activities in global perspective, Prof. J. Lukasiewicz and Dr. K. W. Studnicki-Gizbert, pp 451–459 (Oct.).
The changing horizons for technical progress, L. E. Frisbee and R. H. Hopps, pp 437–450 (Oct.).
Civil transport aviation—progress and promise, J. E. Skeiver, pp 353–365 (Aug.).
The future of rotorcraft in aviation, Dr. J. P. Jones, pp 381–387 (Sept.).
The role of advancing technology in the future of air transport, K. G. Wilkinson, pp 185–192 (May).
A view of the future—constraints and opportunities, Gerald G. Kayten, pp 335–341 (Aug.).

GANDY, R. W. G.
The Commonwealth Advisory Aeronautical Research Council and its influence on research in the Commonwealth, pp 478–501 (Nov.).

GAS TURBINES
The design and performance of high temperature turbines in turbofan engines, G. L. Wilde, pp 342–352 (Aug.).

GAS TURBINE BLADES
Lift and moment fluctuations of a cambered aerofoil under non-convecting streamwise gust, S. S. P. Rao, V. Mukhopadhyay and J. S. Rao, pp 83–87 (Feb.).

GERLACH, Prof. Dr. Ir. O. H.
Development in mathematical models of human pilot behaviour, pp 293–305 (July).

GILL, K. F. and SMITH, E. H.
Controlling the attitude and two flexure-modes of a flexible satellite, pp 41–44 (Jan.).

GLOBAL PERSPECTIVE OF AVIATION
Aviation activities in global perspective, Prof. J. Lukasiewicz and Dr. K. W. Studnicki-Gizbert, pp 451–459 (Oct.).

GRIFFIN, M. J.
The evaluation of human exposure to helicopter vibration, pp 110–123 (March).

GRIFFITHS, R. T.
The effect of aerofoil charcteristics on windmill performance, pp 322–326 (July).

HAINES, A. B.
Computers and wind tunnels: complementary aids to aircraft design, pp 306–321 (July).

HARKER, R. W.
Engines for agricultural aircraft, pp 107–109 (March).

HARRIER Carrier—Vosper Thorneycroft project (illus.), p 33 (Jan.).

HARRISON, J. E. A.
Aerospace cost prediction—the way ahead, pp 213–219 (May).

HARROLD, K. C. and NICOL, S. I. R.
The prediction of design and development costs of civil airliners, pp 139–146 and 170 (April).

HAVE energy, will travel, J. E. Allen, pp 259–270 (June).

HELICOPTERS
The control of vibration in helicopters, D. E. H. Balmford, pp 63–67 (Feb.).
The evaluation of human exposure to helicopter vibration, M. J. Griffin, pp 110–123 (March).

HIGH speed test flying (Eighty Years of Aviation), Charles E. Yeager, pp 10–14 (Jan.).

HITCH, H. P. Y.
Computer aided aircraft project design, pp 51–62 (Feb.).

HITCH, H. P. Y. and SIMPSON, A.
Active control technology, pp 231–246 (June).

HOLLIS, Capt. R.
Simulator training for public transport, flight simulator instructor training symposium, pp 519–520 (Dec.).

HOPKINS, Capt. H. A.
The dismissal of a pilot for poor airmanship, pp 203–206 (May).

HOPPS, R. H. and FRISBEE, L. E.
The changing horizons for technical progress, pp 437–450 (Oct.).

HUMAN RESPONSE
Development in mathematical models of human pilot behaviour, Prof. dr. ir. O. H. Gerlach, pp 293–305 (July).
The evaluation of human exposure to helicopter vibration, M. J. Griffin, pp 110–123 (March).

HURTUBISE, F. G., McKAY, D. H. and MACENKO, F.
Aircraft noise and other types of pollution, pp 469–477 (Nov.).

JONES, Dr. J. P.
The future of rotorcraft in aviation, pp 381–387 (Sept.).

KAYTEN, GERALD G.
A view of the future—constraints and opportunities, pp 335–341 (Aug.).

KEEPING up on the ground, Dr. J. M. Rolfe, pp 281–292 (July).

LANCHESTER MEMORIAL LECTURE—20th
Development in mathematical models of human pilot behaviour, Prof. dr it O. H. Gerlach, pp. 293–305 (July).

LAVERY, Capt. G. T.
Licensing and training, flight simulation instructor training symposium, pp 517–519 (Dec.).

LEGAL aspects of mandatory occurrence reporting and CAA powers and duties in the context of pilot licensing, G. M. E. White, pp 199–201 (May).

LEECH, C. M. and CHAN, D.
Finite difference solutions of compressible viscous fluid flows over pitching bluff bodies, pp 415–421 (Sept.).

LIQUID HYDROGEN
Have energy, will travel, John E. Allen, pp 259–270 (June).

LONG, Maj. G.
Managing the requirement for tactical fighter simulator instructor training, flight simulator instructor training symposium, pp 523–525 (Dec.).

LUKASIEWICZ, Professor J. and STUDNICKI-GIZBERT, Dr. K. W.
Aviation activities in global perspective, pp 451–459 (Oct.).

MACENKO, F., HURTUBISE, F. G. and McKAY, D. H.
Aircraft noise and other types of pollution, pp 469–477 (Nov.).

McKAY, D. H., MACENKO, F. and HURTUBISE, F. G.
Aircraft noise and other types of pollution, pp. 469–477 (Nov.).

MANAGEMENT STUDIES
Aero engine development costing, R. M. Fitzgerald, pp 405–409 (Sept.).
The prediction of design and development costs of civil airliners, K. C. Harrold and S. I. R. Nicol, pp 139–146 and 170 (April).
The problems of research and development cost prediction in an avionics supply company, H. K. Quilter, pp 410–414 (Sept.).

MARKET for small airliners to the early eighties, Philip F. Foreman, pp 171–176 (April).

MATERIALS
Ambient temperature crack growth in titanium alloys and its significance for aircraft structures, R. J. H. Wanhill, pp 68–82 (Feb.).

MATHEMATICAL MODELS
Development in mathematical models of human pilot behaviour, Prof. dr. ir. O. H. Gerlach, pp 293–305 (July).

MELVILL JONES, B.
The streamline aeroplane, pp 5–9 (Jan.).

MITCHELL, R. J., MEMORIAL LECTURE—23rd
Sea Harrier—the first of the new wave, J. W. Fozard, pp 15–40 (Jan.).

MUKHOPADHYAY, V., RAO, S. S. P. and RAO, J. S.
Lift and moment fluctuations of a cambered aerofoil under non-connecting streamwise gust, pp 83–87 (Feb.).

MULDER, Ir. J. A.
The measurement of performance, stability and control characteristics of a high subsonic jet aircraft in non-steady flight conditions employing high accuracy instrumentation techniques, pp 247–258 (June).

NATO
The air defence of the West—a view from NATO's Central Region, General Richard H. Ellis, pp 373–376 (Aug.).

NICHOLL, Capt. J.
The role of synthetic training in general aviation, flight simulator instructor training symposum, p 521 (Dec.).

NICOL, S. I. R. and HARROLD, K. C.
The prediction of design and development costs of civil airliners, pp 139–146 and 170 (April).

NOISE
Aircraft noise and other types of pollution, F. G. Hurtubise, D. H. McKay and F. Macenko, pp 469–477 (Nov.).

OCCURRENCE REPORTING
Legal aspects of mandatory occurrence reporting and CAA powers and duties in the context of pilot licensing, G. M. E. White, pp 199–201 (May).
Operational aspects of mandatory occurrence reporting, J. A. Chadwell, pp 201–203 (May).

OPERATIONS
The continued employment of pilots involved in incidents or accidents: the operators' responsibilities and liabilities, Marcus Edwards, pp 209–212 (May).
The dismissal of a pilot for poor airmanship, Captain H. A. Hopkins, pp 203–206 (May).
The dismissal of a pilot for poor airmanship—the employer's point of view, Captain A. J. Burridge, pp 206–208 (May).
Operational aspects of mandatory occurrence reporting, J. A. Chadwell, pp 201–203 (May).
Third level operations in the United Kingdom, M. A. Ambrose, pp. 124–131 (March).

PERFORMANCE
Active control technology, A. Simpson and H. P. Y. Hitch, pp 231–246 (June).
Flying aeroplanes in buffet, Dr. A. Jean Ross, pp 427–436 (Oct.).
Spray from aircraft undercarriages at high speed—a model investigation, R. V. Barrett, pp 220–225 (May).
The effect of aerofoil characteristics on windmill performance, R. T. Griffiths, pp 322–326 (July).

PICKEN, Capt. J.
A legislative view, flight simulator instructor training symposium, pp 516–517 (Dec.).

POLLUTION
Aircraft noise and other types of pollution, F. G. Hurtubise, D. H. McKay and F. Macenko, pp 469–477 (Nov.).

PORTNOY, H.
Thick two-dimensional wake roll-up behind a wing of finite span—extended calculations, pp 460–463 (Oct.).

POWER SUPPLIES
Electrical power—factors to be considered in future civil aircraft of moderate complexity, H. P. Drury, pp 502–508 (Nov.).
Power utilisation in electronic loads, Dr. A. Bainbridge, pp 399–404 (Sept.).
The systems approach to airborne electrical power supplies, J. P. Ratcliffe, pp 388–398 (Sept.).

PROPELLERS
Developing an Agprop, D. G. M. Davis, pp 97–101 (March).

PROPULSION
Aero engine development costing, R. M. Fitzgerald, pp 405–409 (Sept.).
The design and performance of high temperature turbines in turbofan engines, G. L. Wilde, pp 342–352 (Aug.).
Engines for agricultural aircraft, R. W. Harker, pp 107–109 (March).

QUILTER, H. K.
The problems of research and development cost prediction in an avionics supply company, pp 410–414 (Sept.).

RAeS/NVvl EXCHANGE LECTURE
The measurement of performance, stability and control characteristics of a high subsonic jet aircraft in non-steady flight conditions employing high accuracy instrumentation techniques, Ir J. A. Mulder, pp 247–258 (June).

RAO, J. S., RAO, S. S. P. and MUKHOPADHYAY, V.
Lift and moment fluctuations of a cambered aerofoil under non-convecting streamwise gust, pp 83–87 (Feb.).

RAO, S. S. P., MUKHOPADHYAY, V. and RAO, J. S.
Lift and moment fluctuations of a cambered aerofoil under non-convecting streamwise gust, pp 83–87 (Feb.).

RATCLIFFE, J. P.
The systems approach to airborne electrical power supplies, pp 388–398 (Sept.).

REGIONAL AIR TRANSPORT
A complex market sector, Alan R. Buley, pp 193–198 (May).

Spitfire—a Documentary History, Alfred Price, pp 464–465 (Oct.).
Structure and Properties of Engineering Materials, B. Harris and A. R. Runsell, p 464 (Oct.).
La Turbulence en Mécanique des Fluides, A. Favre *et al.*, p 328 (July).
Van Nostrand Scientific Encyclopedia (Fifth Edition), p 465 (Oct.).
Vector and Tensor Methods, Frank Chorlton, p 133 (March).

RICHARD, Gp. Capt. D. M.
RAF flight simulator instructor selection and training, flight simulator instructor training symposium, pp 525–527 (Dec.).

ROLFE, Dr. J. M.
Keeping up on the ground, pp 281–292 (July).
Introduction, flight simulator instructor training symposium, p 575 (Dec.).

ROSS, Dr. A. JEAN
Flying aeroplanes in buffet, pp 427–436 (Oct.).

ROTORCRAFT
The future of rotorcraft in aviation, Dr. J. P. Jones, pp 381–387 (Sept.).
The control of vibration in helicopters, D. E. H. Balmford, pp 63–67 (Feb.).
The evaluation of human exposure to helicopter vibration, M. J. Griffin, pp 110–123 (March).

SAFETY
Aviation safety versus employment protection: a conflict, Air Law Group symposium, pp 199–212 (May).
Basic safety concepts, Dr. Walter Tye, pp 271–175 (June).

SATELLITES
Controlling the attitude and two flexure-modes of a flexible satellite, E. H. Smith, pp 41–44 (Jan.).

SATELLITE SOLAR POWER
Energy and aerospace, Robert C. Seamans, Jr., pp 147–169 (April).

SEA HARRIER—The first of the new wave, J. W. Fozard, pp 15–40 (Jan.).

SEAMANS, Jr., ROBERT C.
Energy and aerospace, pp 147–169 (April).

SIMPSON, A. and HITCH, H. P. Y.
Active control technology, pp 231–246 (June).

SIMULATORS
Flight simulator instructor training: Flight Simulation Group half-day symposium, pp 515–527 (Dec.).
Keeping up on the ground, Dr. J. M. Rolfe, pp 281–292 (July).

SMALL AIRLINERS
The market for small airliners to the early eighties, Philip F. Foreman, pp 171–176 (April).

SMITH, E. H. and GILL, K. F.
Controlling the attitude and two flexure-modes of a flexible satellite, pp 41–44 (Jan.).

SPACECRAFT
Landsat (illus.), p 157 (April).

SPRAY from aircraft undercarriages at high-speed—a model investigation, R. V. Barrett, pp 220–225 (May).

STREAMLINE aeroplane, The, (Eighty Years of Aviation), B. Melvill Jones, pp 5–9 (Jan.).

STRUCTURES
Ambient temperature crack growth in titanium alloys and its significance for aircraft structures, R. J. H. Wanhill, pp 68–82 (Feb.).
Buckling of simply supported cross-ply cylindrical panels on elastic foundations, G. J. Turvey, pp 88–91 (Feb.).

STEINER, J. E.
Civil transport aviation—progress and promise, pp 353–365 (Aug.).

STUDNICKI-GIZBERT, Dr. K. W. and LUKASIEWICZ, Prof. J.
Aviation activities in global perspective, pp 451–459 (Oct.).

SYNTHETIC FUEL
Have energy, will travel, John E. Allen, pp 259–270 (June).

SYSTEM approach to airborne electrical power supplies, J. P. Ratcliffe, pp 388 –398 (Sept.).

TAYLOR, J.
Atmospheric turbulence loads on aircraft, pp 528–553 (Dec.).

TESTING distribution equipment for agricultural aviation, W. S. Watts, pp 102–106 (March).

THIRD LEVEL AIR TRANSPORT
The market for small airliners to the early eighties, Philip F. Foreman, pp 171–176 (April).
Third level operations in the United Kingdom, M. A. Ambrose, pp 124–131 (March).

TITANIUM ALLOYS
Ambient temperature crack growth in titanium alloys and its significance for aircraft structures, R. J. H. Wanhill, pp 68–82 (Feb.).

TRAINING
Keeping up on the ground, Dr. J. M. Rolfe, pp 281–292 (July).
Flight simulator instructor training symposium, pp 515–527 (Dec.).

TURVEY, G. J.
Buckling of simply supported cross-ply cylindrical panels on elastic foundations, pp 88–91 (Feb.).

TYE, Dr. WALTER
Basic safety concepts, pp 271–275 (June).

UWINS, C. F.
Experimental test flying, pp 2–5 (Jan.).

VIBRATION
The control of vibration in helicopters, D. E. H. Balmford, pp 63–67 (Feb.).
The evaluation of human exposure to helicopter vibration, M. J. Griffin, pp 110–123 (March).

VORTEX WAKES
Thick two-dimensional wake roll-up behind a wing of finite span —extended calculations, H. Portnoy, pp 460–463 (Oct.).

V/STOL
Sea Harrier—The first of the new wave, J. W. Fozard, pp 15–40 (Jan.).

WANHILL, R. J. H.
Ambient temperature crack growth in titanium alloys and its significance for aircraft structures, pp 68–82 (Feb.).

WATTS, W. S.
Testing distribution equipment for agricultural aviation, pp 102–106 (March).

WHEATCROFT, STEPHEN F.
Air transport demand 2000—through a glass darkly, pp 366–372 (Aug.).

WHITE, G. M. E.
Legal aspects of mandatory occurrence reporting and CAA powers and duties in the context of pilot licensing, pp 199–201 (May).

WILDE, G. L.
The design and performance of high temperature turbines in turbofan engines, pp 342–352 (Aug.).

WILKINSON, K. G.
The role of advancing technology in the future of air transport, pp 185–192 (May).

WIND POWER
The effect of aerofoil characteristics on windmill performance, R. T. Griffiths, pp 322–326 (July).

WIND TUNNELS
Computers and wind tunnels: complementary aids to aircraft design, A. B. Haines, pp 306–321 (July).

WRIGHT, WILBUR
Angle of incidence, pp 1–2 (Jan.).

WRIGHT, WILBUR and ORVILLE MEMORIAL LECTURE—65th
Energy and aerospace, Robert C. Seamans, Jr., pp 147–169 (April).

YEAGER, Lt.-Colonel CHARLES E.
High speed test flying, pp 10–14 (Jan.).
